

**About Bluetooth Connection**

This system supports security functions that comply with the Bluetooth specification to ensure secure connection during communication using Bluetooth technology. However, this security setting contents may be insufficient, so it cannot guarantee the connection with all products using the Bluetooth technology.

**\*BLUETOOTH devices must be used within approximately 10 meters (unobstructed distance) of each other, in order to get the best sound quality and connection.**

**\*In the following cases, your user experience may be affected:**

- When a person, metal object, wall or other obstruction is between the devices with a Bluetooth connection.
- When there is an established wireless LAN or other

disturbing frequencies nearby.

- Near a microwave oven in use or other electromagnetic wave devices.
- At a crowded area with dense wireless signals, such as subway or shopping mall.
- On a high-speed train, car or airplane.

**\*The Bluetooth connection of this system may be established based on aptX, aptX HD, HWA or LDAC, which focuses more on the sound quality. In this case, the effective distance will be reduced compared to using SBC or AAC.**

**\*If the Bluetooth devices fail to connect or have disturbing noises, try the following:**

- If the Bluetooth connection fails or becomes unstable, please use this system at least 10 meters away from the nearby wireless LAN devices or turn off the LAN devices. If you cannot turn off them, you may switch the WLAN connection of the player device to Cellular data connection.
- Put the Bluetooth devices as close as possible and make sure there are no obstacles such as human

body between them.

- If stuttering sound happens when streaming music, you may try first downloading the music and then playing it locally.
- Stuttering sound may happen when there're multiple apps running on the playing device. You may turn off the idle apps to ensure stable Bluetooth connection.
- If the above solutions still fail to improve the situation, please adjust the Bluetooth connection mode from aptX, aptX HD, HWA or LDAC to SBC or AAC.

**\*In the following locations, please be sure to turn off the power on this system and Bluetooth device:**

- In the hospital, petrol station or any place where flammable gas may exist.
- Close to automatic door or fire alarm.
- Other places where Bluetooth devices are not allowed to use.

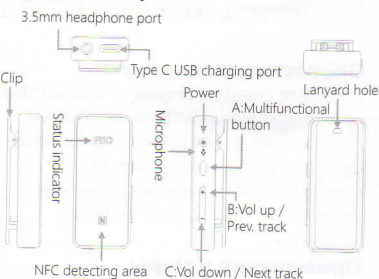

For any further questions, please consult local sales agents or contact FiiO customer service directly by sending email to [support@fiiio.net](mailto:support@fiiio.net).

**\*Tips**

- The LDAC connection transmits 3 times more data than normal Bluetooth connections (at the higher transmission speed of 990kbps) which provides high quality wireless listening experience.
- The aptX/aptX Low Latency/aptX-HD are using digital audio compression algorithms based on ADPCM (SB-ADPCM) technology. Owing to its advantages of low latency, good fault-tolerance and high sound quality, they have been widely applied in Bluetooth wireless audio transmission fields since recently.

**\*Note: The LDAC, HWA and aptX are independent technologies. They require both the two connected Bluetooth devices to support LDAC/aptX, in order to achieve LDAC/aptX transmissions respectively.**

## English Bluetooth Headphone Amplifier

**Buttons and Ports Labeled/ Operation Explained****Functions & Operations**

**•Power on/off:** Hold the Power button for about 3 seconds until the blue light flashes for three times, and the device will then power on/off.

**•Reset:** Hold the Power button for about 10 seconds at any time.

**USB DAC mode:** After connecting the BTR3 to computer, click the Power button for 3

## English Bluetooth Headphone Amplifier

times until the white light stays steadily on.

**Firmware upgrade:** Please go to <https://www.fiiio.com/supports> to get the detailed instruction.

**•Enter pairing mode**

1. After powered on for the first time: the device would automatically enter the pairing mode, and the red and blue lights will flash alternately.

2. Force the device to enter Pairing mode: Hold the button A for about 5 seconds when the device is on, and the red and blue lights will flash alternately.

3. Clear current pairing: Hold the button B and C at the same time for about 5 seconds when the device is on.

4. The BTR3 supports connecting with two devices at the same time.

**•Enter reconnecting mode**

1. After disconnection, the blue light will flash twice every two seconds; click the button A to reconnect.

2. After the device restarted, it will reconnect to the last connected device automatically.

## English Bluetooth Headphone Amplifier

**•Operation instruction after a successful pairing:**

Play/Pause/Answer phone call/End calling/Cancel a call: Click button A.

Reject phone call: Hold the button A for about 2 seconds when there's an incoming call.

Volume up/down: Click button B/C turn up/down the volume.

Switch songs: Hold the button B/C about 2 seconds to switch to the previous/next song.

Switch input devices: When connecting to two input devices, double click the Power button to switch between the two.

Activate Siri: Double click the button A.

**•One-touch NFC pairing:**

When the BTR3 is on and the Android device is unlocked with NFC enabled, get the two devices touched by the NFC detecting area to start the pairing.

**Indicator Display****1. Status indicator display (when not playing)**

Status	Blue light	Red light
1. Low battery warning	Off	Indicates the current working status

## English Bluetooth Headphone Amplifier

2. Device connected	Flashes once every 3 seconds	Off
3. Charging	Indicates the current working status	
4. Charging completed		

**2. Indicator display of different input codecs (when playing)**

Codec	In normal state	Low battery warning	Charging
SBC	Blue light pulsates	Red light indicates the current working status	Codec indicator stays steadily on
AAC	Cyanic light pulsates		
aptX, aptX LL	Purple light pulsates		
aptX HD	Yellow light pulsates		
LDAC	White light pulsates		
LHDC	Green light pulsates		

**Notification Sounds**

There will be notification sounds under the following status: Power on, power off, pair, connect, clear pairing history, Max. volume, low battery warning and pairing disconnected.

## English Bluetooth Headphone Amplifier

**Notes and Precautions**

- ★It's recommended to charge the device using a standard 5V charger.
- ★Please don't place the device in circumstance of excessive high/low temperature (above 45°C or below 0°C)
- ★Please keep the device away from liquids to avoid any damage to it.
- ★If the device is to be left unused for a long time, please recharge it periodically to preserve its battery life.
- ★Please adjust the volume to a suitable level before putting on the earphones to protect your hearing.
- ★Please do not disassemble, damage the battery, or drop it into fire; it's prohibited to continue using after the battery is soaked in water.

**List of Items Included**

BTR3*1	Type C USB cable*1
Lanyard*1	Quick start guide*1
Warranty card*1

**WEEE Directive & Product Disposal**

At the end of its serviceable life, this product should not be handed as household or general waste. It should be handed over to the applicable collection point for the recycling of electrical and electronic equipment, or returned to the supplier for disposal.

**Internal/Supplied Batteries**

This symbol on the battery indicates that the battery is to be collected separately. This battery is designed for separate collection at an appropriate collection point.
